

# New Metal Roofing Product Offering

## SEM-LOK Striated Panel

*This new product expands the current product offering for Southeastern Metals, Standing Seam Metal Roofing Panel Systems to include an optional "striated" version to the previously available flat or ribbed product profiles.*

This optional panel design feature provides a metal roofing profile enhancement to minimize the effects of cross panel tensioning or oil canning.

### **Premium Design Features Include:**

- ✓ Panels are available from 4' custom cut to the inch up to 45'
- ✓ LEED rated and Energy Star efficient
- ✓ Miami Dade County, Florida Building Code & Texas Department of Insurance Compliant
- ✓ Available panel finish acrylic coated Galvalume or Premium Kynar PVDF paint
- ✓ Wide Variety of Colors with matched accessories and trims
- ✓ Installs over existing shingles or on solid decking

*The concealed fastened series of standing seam panels offers a width of 16" profile design and now "Striated" to create interesting shadow lines across the length of the panel.*

*These panel profiles are designed to complement any architectural or commercial project.*
